Charles B. de Nancrede Professor

Professor of Pathology, Immunology, Biology, and Surgery

Director, Center of Excellence for Cancer Immunology and Immunotherapy

Co-Director, Cancer Hematopoiesis and Immunology Program

Co-Director, Immunologic Monitoring Core

Chairperson, Cancer Immunology Working Group, AACR (2019-2020)

Dr. Weiping Zou is a director of the Center of Excellence for Cancer Immunology and Immunotherapy in University of Michigan. Dr. Zou leads a multidisciplinary laboratory that investigates the human tumor microenvironment with the goal of understanding the genetic, epigenetic, and metabolic nature of human tumor immune responses and developing mechanism-informed combination therapies for cancer. The laboratory has demonstrated that the interaction between tumor cells and the host immune system fosters tumor immunosuppressive networks and results in cancer progression and therapeutic resistance. He has published more than 150 articles in top-ranked journals including Nature, Cell, Nature Immunology, Cell Metabolism, and Cancer Cell.
